

FAIR Workshop

Introduction to GitHub

Thursday, Dec. 15th | 9:30-11:30 AM

This is the second in a series of FAIR workshops provided by the Trans-Divisional Research Program. This workshop will provide instructions and hands-on experience with using GitHub to support FAIR practices for epidemiology research.

Participants will receive an overview of GitHub, GitHub Desktop, and integrating RStudio with GitHub. Attendees will practice:

- 1) Creating local and remote repositories
- 2) Using GitHub versioning control to manage your programs
- 3) Working with collaborators over GitHub

Support from instructors during the hands-on portion of the workshop will be provided only to in person participants.

Please be advised: Prior to attending the workshop attendees **need to**:

- 1) Install [R](#) and [RStudio](#) on their laptop
- 2) Have an active NIH Box account
- 3) Create a [GitHub account](#)
- 4) Install [GitHub Desktop](#)
- 5) [Authenticate](#) yourself on GitHub Desktop

For help with the workshop prerequisites, see this [help document](#), attend the [DCEG FAIR Friday meeting](#) for in person help scheduled every Friday, 11:00-12:00, and join us at the [DCEG FAIR chatroom](#) (just need your GitHub ID to log in 😊)
